## VISIT DUNMORE AT INTERSOLAR BOOTH #5422

### **DUNMORE to Showcase Solar Module Cost Reduction Strategies at Intersolar North America 2011**

*Executives on Hand to Discuss FastCert Product Certification Program, Alternative Materials and Processes for Solar Module Development*

**Bristol, Pa., June 29, 2011** – Overcoming the solar industry’s number-one strategic challenge, driving down the cost of solar modules, will be [DUNMORE Corporation’s](#) focus at the upcoming [Intersolar North America 2011](#) conference.

Reducing costs to make solar power competitive with fossil fuels is the key to gaining wider market acceptance. During the Intersolar exhibition, DUNMORE will offer advice on material choices, manufacturing and certification processes that can cut the cost of producing solar modules. The company will detail its FastCert™ program, which helps module manufacturers bring new products to market faster and at a lower cost. FastCert streamlines solar module development from concept through qualification and production. Drawing on its 40-plus years of manufacturing and material science experience, DUNMORE helps solar module producers optimize designs, quickly earn certification from standards bodies such as Underwriters Laboratories and the International Engineering Consortium, and identify reliable, economical material sources.

“The only way for solar to reach the cost levels it has to reach is by attacking expenses at every facet of solar module development,” said John Jordon, DUNMORE vice president. “FastCert is designed to uncover savings everywhere in the design, certification and manufacturing processes without compromising performance.”

In addition to FastCert, DUNMORE will also be demonstrating its [DUN-SOLAR™ photovoltaic backsheets](#), including its FPE fluorinated products, TPE backsheets using DuPont™ Tedlar® and PPE+ all-polyester constructions.

#### **About DUNMORE**

DUNMORE Corporation is a global supplier of engineered coated and laminated films. DUNMORE offers film conversion services such as coating, metallizing and laminating along with contract film manufacturing. DUNMORE produces coated film, metallized film and laminating film substrates for the photovoltaic, graphic arts, packaging, aerospace, insulation, surfacing and fashion industries. DUNMORE is privately held, ISO 9001:2008 and OSHA VPP certified. For complete information on DUNMORE’s products, services and industries served, please visit DUNMORE’s website <http://www.dunmore.com/>.
